TJ Green Associates to offer a microwave packaging technology course in Boston

[TJ Green Associates LLC](#)

April 4, 2014

TJ Green Associates LLC (<http://www.tjgreenllc.com>) announced it will be offering a three day microwave packaging technology course in Boston, May 7-9th.

"We're very excited about the upcoming Boston course right after the [New England IMAPS Symposium](#) on May 6th," said principal and founder Thomas J. Green. "Our Microwave Packaging Technology course helps companies develop new RF/MMIC and microwave modules for use in extreme military, space, and commercial environments. The course is for process and quality engineers, designers, and managers who are responsible for microwave hybrid design and manufacturing and takes an in-depth look at design issues, material trade-offs, and process selection."

Microwave Packaging Technology Boston Mass.-- May 7-9th, 2014 (3 days) Included in the course is a comprehensive student workbook plus continental breakfast and lunch daily. A complete course outline can be viewed at:

<http://www.tjgreenllc.com/course/microwave-packaging-technology - outline>

Class size is limited to allow for maximum student interaction. Register now.

The company offers microelectronics training and consulting and is led by Green, an industry recognized hybrid materials and process expert who brings over 30 years of microelectronics manufacturing experience to the classroom. This Microwave Packaging Technology class will be taught along with a seasoned co-instructor Tom Terlizzi, VP at [Agile Microwave Technology, Inc.](#)

Green concluded, "Companies who invest in our training gain immediate access to specialized knowledge from industry experts that you just won't find anywhere else. We're expecting heavier than usual demand this year and our limited number of openings will fill up quickly."
